

LOCKEY® STYLE - 2500 Hook Bolt for Sliding Doors

The hook latch is designed for sliding doors. When turned to the locked position, the hook will strike into the mortised jamb or into the surface mounted strike plate. Both are included with each lock. The 2500 lock can also be like the 2200 rim type deadbolt. The 2500 lock is most commonly used on sliding glass doors where a hook lock is used.

USES

- Sliding Glass Doors
- Sliding Gates
- Door Walls
- Any sliding door that would need a hook to lock and secure it.

DIMENSIONS
